

GRAND MORSE[®] DAY

8/10/18

9.00 - 11.00 Neodent Lecture : by Dr. Carlos Araujo

- Understanding the GRAND-MORSE Philosophy
- Mechanical and biological aspects-Scientific Basis
- Tissue reactions to GM Cone-Morse implants and clinical Implications
- Histological studies
- The myths behind the Platform Switch concept : GRAND-MORSE GM features end Reduced Diameter of Emergence-RDE
- Single and Partial Cases-Exploring the features of the conical connection-Clinical Tips

11.00 - 11.15 Coffee break

11.15 - 12.00 Botiss Special Lecture : by Dr. Supachai Suphangul
Grafting material & Immediate implant placement
: How to deal with jumping gap for optimum outcome

12.00 - 13.00 Lunch

13.00 - 13.45 Botiss Special Lecture : by Dr. Atiphan Pimkhaokham
" Secret of GBR Success "

13.45 - 14.00 Coffee break

14.00 - 16.00 Neodent Lecture : by Dr. Carlos Araujo

- The GM Line: Basic characteristics and what to expect from the new implant
- Contiguous Implants in the esthetic area: Discussing inter-implant distances at the light of recent research
- Scientifically determination on whether to screw retain or cement implant prostheses
- The different choices for GRAND-MORSE GM Implants
- Histology behind the immediate implant after extraction: Bone and soft tissue preservation for perfect esthetics
- Immediate Implant after Extraction : Clinical Protocol

at **DUSIT THANI BANGKOK Hotel**
Grand Ballroom Bangkok, Thailand
